Work Experience

Staff Geologist II

United Consulting, Birmingham, Alabama (March 2024 - Present)

- Lead environmental and geotechnical field operations across the Southeast U.S., including soil/soil gas sampling, groundwater well installation, radon and materials testing, environmental inspections, and geophysical evaluations for Phase I/II ESAs, VCP, and Brownfields projects.
- Develop site plans, sampling figures, and borehole maps using ArcGIS; apply borehole logging using Strater for conceptual site models and remedial planning.
- Validate and statistically analyze soil and groundwater data to ensure integrity, QA/QC, and compliance with ADEM and EPA standards.
- Author technical reports, permit applications, and remedial documentation; coordinate findings and corrective actions with regulatory agencies.
- Experienced in emerging contaminants of concern, including PFAS assessment and remediation support.
- Engage in continuous education through seminars and training sessions.

Project Manager | Environmental Specialist

Kansas Department of Health and Environment, Topeka, KS (March 2023 – March 2024)

- Manage more than 50 Voluntary Cleanup Program (VCP) sites on environmentally contaminated sites and other assigned projects where ongoing investigation and cleanup are occurring; evaluate investigative, monitoring, and general remedial progress to ensure projects are completed within timeframes established by state law and budgets.
- Interact with project stakeholders and the public to facilitate timely site investigations and cleanups and disseminate information to the community.
- Provide field oversight and ensure regulatory compliance to meet state and federal regulations. Conduct quality assurance/quality control sampling for maintaining work integrity.

Graduate Teaching/Research Assistant

Kansas State University, Manhattan, KS (January 2021 - December 2022)

- Conducted OSL (Optically Stimulated Luminescence) laboratory and field analyses for age-dating and sediment characterization supporting master's thesis research on glacial history.
- Taught laboratory sections, graded coursework, and supported instruction for undergraduate geology courses.

Publication Formatting Editor

Cactus Communications, Mumbai, India (November 2019 - January 2020)

- Edited and formatted scientific manuscripts in the physical sciences for submission to international peer-reviewed journals, ensuring adherence to academic and publication standards.

Planetary Glaciology Research Intern

Physical Research Laboratory, Indian Space Research organization, Ahmedabad, India (May 2019 - June 2019)

- Analyzed geomorphic and glacial landforms in the Erebus Montes region of Mars using ArcGIS to identify evidence of past glaciation.

Glaciology Intern

Wadia Institute of Himalayan Geology, Dehradun, India (June 2018 - March 2019)

- Assessed glacial advance and retreat using long-term hydrological and meteorological datasets to understand Himalayan glaciation dynamics.

Education

Master of Science in Geology

Kansas State University, Manhattan, Kansas (Jan 2021 - May 2023)

- Title of Master's thesis: Extent and glacial history of the Cordilleran Ice Sheet in northwest Montana: Using OSL to date glacial sediments from the southeastern Flathead Lobe **(https://hdl.handle.net/2097/43469)**.
- Relevant Courses: Field Geology, MATLAB, Isotope Geochemistry, Remote Sensing of Water, Water resource geochemistry, Field Geophysics, Economic Geology

Master of Science in Applied Geology

Barkatullah University, Bhopal, MP, India (April 2016 - May 2018)

- Relevant Courses: Hydrology, Exploration geology, Mineralogy, Petrology, GIS.
- Research Project: Understand the sediment delivery from glaciated basins, characteristics, and variation of the suspended sediment concentrations in the pro-glacial melt-water stream, have been monitored during the ablation season (May– September).

Bachelor of Science

MVM College, Barkatullah University, Bhopal, India (March 2012 - May 2015)

- Relevant Courses: Physics, Mathematics, and Geology.

Skills and Achievements

- **Technical Skills:** MS Office, R Programming Language, MATLAB, Arc GIS, Remote Sensing, OSL dating, Field sampling & Data gathering, Data A nalysis.
- **Achievements:** Completed more than 50 Phase I and approximately 30 Phase II Environmental Site Assessments | Presented my Master's research at GSA connects conference, New World Luminescence Dating Workshop, Kansas State University.
- **Certificate:** ArcGIS Pro Quick-Start for the GIS Professional, Inner Corridor Technologies, Inc., | Copernicus MOOC; European Space Agency (03/2020 - 05/2020) | OSHA HAZWOPER training (40-hour).
- **Field Experience:** Led Phase I and Phase II environmental field investigations across the Alabama, Georgia, Tennessee, Louisiana, Florida, Mississippi, and North Carolina | Conducted sampling in Flathead Lake, Montana as part of Master's thesis research | Part of a Geologic tour to Yellowstone National Park, Glacier National Park, and Teton National Park. | Identified the orientation and formation of Geologic Features in the Vindhyan Mountain Ranges, Dokriani Glacier, Indian Himalayas | Visited the NMDC Panna Diamond Mines, India to determine the working of the mine.
